

**IN THE CLAIMS:**

The text of all pending claims, (including withdrawn claims) is set forth below. Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~strikethrough~~. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered).

Please AMEND claims in accordance with the following:

1. (CURRENTLY AMENDED) An image photographing system, comprising:  
a display unit displaying a screen configured by a first display area displaying an image from an image acquisition device, and a second display area displaying a sequence of images;  
a detecting unit detecting a photographing instruction; and  
a generating unit generating image data from the image when detecting the photographing instruction; ~~and~~  
wherein the screen includes a number display area displaying a number of the generated image data, and  
the image photographing system comprises a renumbering unit renumbering the number of the generated image data responsive to an operation command relocating an order within the sequence of images.

2-4. (CANCELLED)

5. (PREVIOUSLY PRESENTED) The image photographing system according to claim 1, wherein the image acquisition device is a device outside of the image photographing system.

6. (CANCELLED)

7. (CURRENTLY AMENDED) A computer-readable storage medium ~~readable by a machine~~ embodying a program of instructions ~~executable by causing a the machinemachine~~ computer to perform operations, comprising:

displaying a screen configured by a first display area displaying an image from an image acquisition device, a second display area displaying a sequence of ~~image data~~images, and a number display area displaying a number of the images;

detecting a photographing instruction;  
generating image data from the image when detecting the photographing instruction;  
and  
updating a display of the number display area to the number of the generated image data responsive to the generating of the image data; and  
renumbering the number of the generated image data responsive to an operation command relocating an order within the sequence of images.

8. (CANCELLED)

9. (CURRENTLY AMENDED) The computer-readable storage medium readable by a machine embodying the instructions executable by the machine according to claim 7, wherein the image acquisition device is a device outside of the machine.

10. (WITHDRAWN) A data management device comprising:  
a display screen arranging and displaying a predetermined number of data identifying elements identifying data,  
wherein if the number of pieces of data to be managed exceeds the number of pieces of data displayable on said display screen and if data to be managed is added, the added data is inserted in a layout of the data identifying elements displayed.

11. (WITHDRAWN) A storage medium readable by a machine, tangible embodying a program of instructions executable by the machine to perform method steps for making a computer manage data, the method steps comprising:  
arranging and displaying a predetermined number of data identifying elements for identifying data;  
adding data to be managed; and  
inserting and displaying the added data in a layout of the data identifying elements displayed if the number of pieces of data to be managed exceeds the number of pieces of data displayable on a display screen and if data to be managed is added.

12. (CURRENTLY AMENDED) An image photographing method, comprising:  
detecting a photographing instruction;

displaying a screen configured by a first display area displaying an image from an image acquisition device, a second display area displaying a sequence of ~~image data~~images, and a number display area displaying a number of the images;

generating image data from the image when detecting the photographing instruction;  
and

updating a display of the number display area to the number of the generated image data responsive to the generating of the image data; and

renumbering the number of the generated image data responsive to an operation command relocating an order within the sequence of images.

13. (CANCELLED)

14. (PREVIOUSLY PRESENTED) The image photographing method according to claim 12, wherein the image acquisition device is a device outside of a device which performs the method.

15. (CANCELLED)

16. (CURRENTLY AMENDED) A computer readable storage medium storing a program executable by a computer connected with an image acquisition device to perform operations, comprising:

providing a first display area displaying an image from the image acquisition device, providing a second display area displaying a sequence of stored image data, and providing a number display area displaying a number of the stored image data; and

acquiring the image from the image acquisition device and generating image data related to the acquired image,

wherein the generated image data is automatically stored at a selected position of the displayed sequence of stored image data in accordance with a user's instruction when the image is acquired, and a display of the number display area is updated to the number of the stored image data responsive to the generating of the image data, and

the number of the generated image data is renumbered responsive to an operation command relocating an order within the sequence of images.

17. (CANCELLED)

18. (CURRENTLY AMENDED) An image photographing method, comprising:  
generating image data corresponding to images ~~photographed~~ responsive to a photographing instruction and displaying said images in frames; and  
moving ~~one of said images~~ a newly added image in a direction between said frames indicated by a user during said displaying and updating a display number of said ~~one of images~~ based on said moving by the user.

19. (PREVIOUSLY PRESENTED) The image photographing system according to claim 1, wherein the second display area includes the number display area.

20. (CURRENTLY AMENDED) The image photographing system according to claim 1, wherein the second display area ~~is~~ simulates a configuration of a real film including a sequence of frames of the images, side belt parts along both sides of the sequence of the frames, and partitions dividing a frame from a next frame.

21. (PREVIOUSLY PRESENTED) The image photographing system according to claim 1, wherein the display unit comprises a touch panel detecting a user's operation thereto and the screen comprises a button generating the photographing instruction responsive to the user's operation to the touch panel.

22. (PREVIOUSLY PRESENTED) The image photographing system according to claim 5, wherein

the image acquisition device includes a button acquiring the image, and

the display unit includes a touch panel detecting a user's operation thereto and the screen comprises a button generating the photographing instruction responsive to the user's operation to the touch panel as substitute for the button of the image acquisition device.
